

COUNTERTOP 1200 L HOLE KENSHO

Item number: 1590500

Countertops made from Silestone; durable quartz slabs with beautiful colours and textures. Available in several lengths and combinations as one piece (no seams), even in a base unit and side module combination. The holes are prepared and fit our freestanding washbasins with high mixer mounted on the countertop. The Kensho model is kept in stock, the others are made to order.

ETIM	EC010460	Package width (m)	1,230
Product dimensions and weight		Package depth(m)	0,475
Width	1210	Package weight(kg)	17,200
Depth (mm)	462		
Height (mm)	12		
Net weight (kg)	17,2		
Left/right model	Vänster		

CARE INSTRUCTIONS

Silestone countertops Silestone is a stone material that comprises 94 % quartz, making it hard and durable. The countertop is completely homogeneous, without any joints. Silestone is a non-porous surface, which makes it resistant to staining by oils, make-up and many other everyday products. However, you should avoid exposing the countertop to acetone, which can cause staining. Do not place hot utensils such as straightening or curling irons directly on the surface, the high temperature may damage the surface For day-to-day cleaning, use a mild cleaning product. Do not use abrasive sponges or agents. Do not use strong chemicals, bleach, chlorine-based products, etc. The countertop has a matt finish with a light texture for a soft feel. Do not polish the countertop. The countertop should be protected from knocks that may cause it to become chipped.
